

**Products of high-tech ceramics
for industry and research**

Delivery programme:

The quality of the materials together with precision manufacturing based on customer-specific drawings are the distinguishing features of our products. Our possibilities include the manufacture of prototypes as well as series production.

Laboratory ceramics

Crucibles and pans for high-temperature processes

Precision balls

In accordance with DIN 5401 and A.F.B.M.A
Application as valve balls for dosing pumps,
calibration and measuring ball

Your partner for high-tech ceramics
